

PCCharge Pro

Payment Processing at Its Best

PCCharge Pro™ is an award-winning payment processing software product designed to save merchants time and money by providing powerful features and performance at the point-of-sale. PCCharge Pro is a cost-effective solution for all business types, including brick-and-mortar merchants, eStores, and MOTO (mail-order/telephone order) shops.

PCCharge is upgradeable, so it won't become obsolete like terminals do! And, because PCCharge is not a gateway, there are no costly access fees. PCCharge is payment processing at its best!

Flexibility Meets Functionality

- ✓ Certified with major credit/debit/gift card and check processors
- ✓ Multiple payment types accepted: All major Credit Cards, Debit Cards, EBT, Purchasing Cards (Level II), Gift/Loyalty Cards, and Check Verification, Guarantee & Conversion
- ✓ Certified for multiple connectivity methods, including Dial-up Modem (Direct Connection), TCP/IP (Leased Line), TCP/IP (Internet), TCP/IP (ISDN).
- ✓ Client Server software supports customer database capabilities, card readers, PIN pads, and check readers
- ✓ Customer database with recurring and installment billing allows you to schedule payment processing according to your specific business requirements
- ✓ Supports single or multi-users. There's no limit of merchant numbers in PCCharge Pro.*
- ✓ Designed for stand-alone, client-server, or integrated solutions. Use out of the box or as part of an integrated POS solution.
- ✓ Robust and customizable reporting features
- ✓ Real time or batch transaction processing
- ✓ Split dial authorization for Discover and American Express (selected processors) and direct settlement option with American Express saves merchants money!
- ✓ MOTO Master Book and Ship Module allows pre-auth information to be stored until merchandise is shipped, eliminating the re-keying of information and providing a management tool for mail-order/telephone-order (MOTO) merchants
- ✓ Wireless capability permits mobile merchants to process transactions over the Internet via TCP/IP using a cell phone

Security with Fraud Protection Plus:

- ✓ Meets VISA CISP (Cardholder Information Security Program) requirements
- ✓ MSV™ (Magnetic Strip Verification), CVV2, and AVS (Address Verification Services), data file encryption, and secure receipts reduce fraud, chargebacks, and may qualify merchants for lower interchange rates.
- ✓ User level password protection provides controlled permissions

** Additional Merchant Numbers may be added for a fee.*
